

SECURITY CULTURE PLATFORM | DCT SECURITY

# Train your people. Test their instincts. Know your risk.

goDeep is a multi-tenant security awareness training and phishing simulation platform. It delivers structured training paths to your staff, runs realistic simulated phishing campaigns, and turns the results - together with real-world breach intelligence - into a clear, quantified picture of your organisation's human risk.

01

## Train

Structured video-and-quiz training paths, assigned by user, department or company - with monthly drip scheduling.

02

## Phish

Realistic phishing, spear phishing and QR-code simulations on one-off or recurring schedules, with rich analytics.

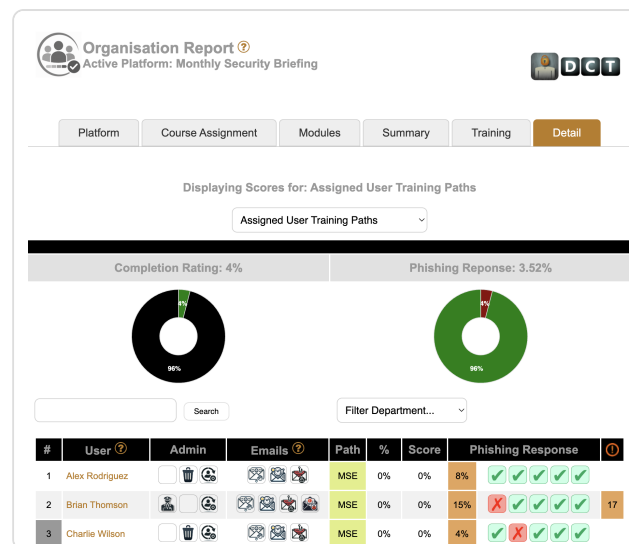

03

## Score Risk

A combined risk score per user, blending phishing behaviour with breach exposure from the HIBP database.

## 01 Security Awareness Training

- ▶ **Structured training paths** - video modules and quizzes in ordered sections that unlock as staff progress.
- ▶ **Monthly drip scheduling** - release training progressively so staff engage steadily instead of rushing through.
- ▶ **Flexible assignment** - assign courses per user, per department, or organisation-wide in a couple of clicks.
- ▶ **Live progress dashboards** - completion, quiz scores and module-level reporting, filterable by department or path.
- ▶ **Automated communications** - scheduled welcome and reminder emails keep participation high with no admin effort.
- ▶ **Reports on demand** - PDF and Excel exports, plus one-click report emails to stakeholders.

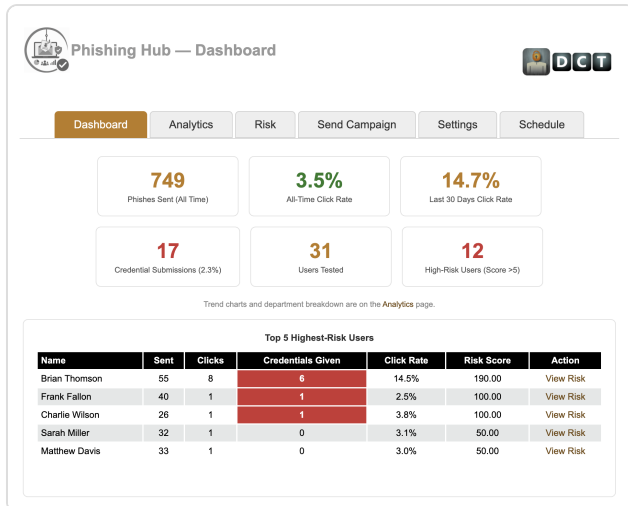

The Org Report - completion, scores and phishing response at a glance.

| # | User           | Admin | Emails | Path | %  | Score | Phishing Response |  |
|---|----------------|-------|--------|------|----|-------|-------------------|--|
| 1 | Alex Rodriguez |       |        | MSE  | 0% | 0%    | 8%                |  |
| 2 | Brian Thomson  |       |        | MSE  | 0% | 0%    | 15%               |  |
| 3 | Charlie Wilson |       |        | MSE  | 0% | 0%    | 4%                |  |
| 4 | Daniel Hughes  |       |        | MSE  | 8% | 8%    | 0%                |  |
| 5 | David Levinson |       |        | MSE  | 0% | 0%    | 8%                |  |
| 6 | David Wilson   |       |        | MSE  | 0% | 0%    | 3%                |  |

Per-user status with instant actions.

## 02 Phishing Simulation

The Phishing Hub - campaigns, click rates and highest-risk users.

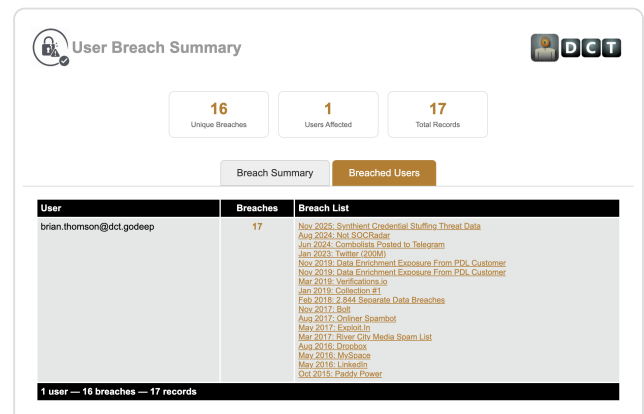

- ▶ **Realistic template library** - pre-built phishing emails sent from a controlled domain, targeted at users or departments.
- ▶ **Set-and-forget scheduling** - one-off sends or recurring daily, weekly or monthly campaigns.
- ▶ **Spear & QR-code phishing** - personalised targeted simulations and QR-based attack scenarios.
- ▶ **Deep analytics** - click-rate trends over time, department comparisons, repeat clickers, and who's improving vs. slipping.
- ▶ **Granular results** - distinguish link clicks from credential submissions on fake login pages, per user, per campaign.

## 03 Human Risk Scoring

- ▶ **Phish Risk Score** - clicks score 5, credential submissions score 10, weighted so recent behaviour counts most.
- ▶ **Breach Risk Score** - powered by Have I Been Pwned intelligence; breaches are scored by the sensitivity of data exposed and recency.
- ▶ **Risk dashboards** - risk distribution by severity and a ranked table of your highest-risk users; drill into a per-user phishing and breach report.
- ▶ **Targeted response** - send breach notifications to affected users directly from the breach view.

**Combined Risk = (Phish Score × 0.6) + (Breach Score × 0.4)**

One weighted number per user - so you always know exactly where to focus.

Breach intelligence - see which users appear in publicised breaches.

### ALSO IN THE BOX

#### Passwordless login

Secure, time-limited email login links - nothing for staff to remember or reset.

#### Multi-tenancy

Manage multiple business units with isolated databases from one admin area.

#### Departments

Group users for targeted training, phishing and reporting.

#### Built-in help

Contextual video guides on every admin page, plus direct support.
