

GODEEP STORIES

Cyber awareness told through character-driven stories

OVERVIEW

goDeep Stories is a drama-led cyber awareness programme that puts staff inside the story. Set across the offices of Digital Creative Technologies, each story arc follows a recurring cast of characters through a real-world cyber incident — from first mistake to full consequence — before a short quiz locks in the lesson. Delivered across 8 story arcs comprising 24 episodes and 8 quizzes (3hr 30min of content), the series covers passwords, public spaces, home working, AI, data protection, phishing and social engineering.

8 STORY ARCS

1

Introduction

Discover the story behind goDeep Stories, follow Digital Creative Technologies as it comes under a series of cyber attacks, then meet the threat actors behind them.

5

Artificial Intelligence

What is AI, and what are the dangers? Meet our intense AI persona as it attempts to hack Digital Creative Technologies, then learn the countermeasures that stop it in its tracks.

2

Password Security

What are passwords, really? Brian discovers the danger of credential stuffing, then we unpack the countermeasures that stop us giving our passwords away.

6

Data Protection

Data protection is serious business. Lisa learns that being tired after a long day can cost you everything, then we cover what to do after a breach and how to dodge banking scams.

3

Security in Public Spaces

Heading out? Learn what to watch for before you go. Rebecca finds Dan is no help at all when she gets hacked, then we cover how to stay safe while travelling.

7

Phishing

Everyone knows what phishing is — it's about to get a lot more sophisticated. Rachel's rush to her sister's wedding leaves a time-bomb waiting for her return, then we unpack what should have stopped it.

4

Security at Home

Working from home is everywhere now — find out what's really going on behind your front door. David discovers his new washing machine cost him far more than he paid for it, then we track down the Shadow Monster's return.

8

Social Engineering

It's psychology, isn't it? James is single and a little lonely, then he meets someone online... We find out how Sasha pulled it off, and how bad it got for James.
